

A-C CONTROL ASSEMBLY with Dial Type Blower Speed Control Switch

ADJUSTMENT OF AIR MIX DAMPER CONTROL CABLE

ADJUST AIR MIX DAMPER CONTROL CABLE

Set the air mix damper and the temperature control switch to "COOL", then install the control cable and lock the clamp.

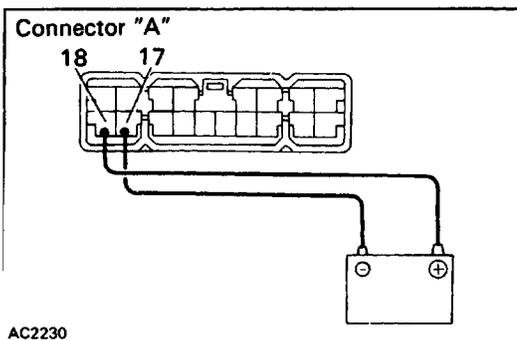

ADJUSTMENT OF AIR MIX CONTROL CABLE

ADJUST WATER VALVE CONTROL CABLE

Set the water valve and the temperature control switch to "COOL", then install the control cable and lock the clamp.

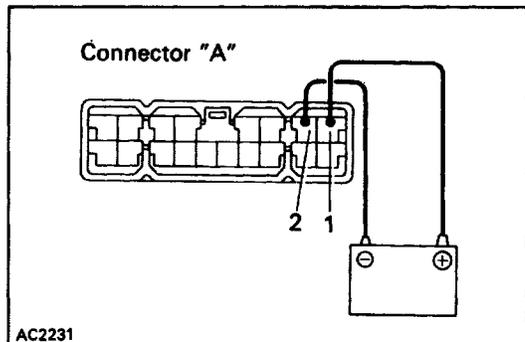

HINT: For the servomotor type temperature control switch, set the switch to "COOL" when the ignition switch is turned ON and the blower motor is operating.

INSPECTION OF A/C CONTROL ASSEMBLY Illumination

INSPECT ILLUMINATION

- (a) Connect the positive (+) lead from the battery to terminal A-18 and the negative (-) lead to terminal A-17.
- (b) Check that the illumination lights up.
If the illumination does not light up, test the bulb.

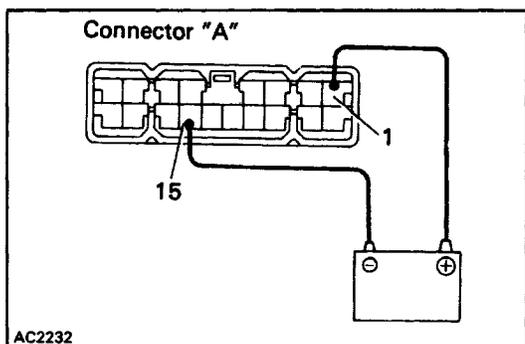

Indicators

1. INSPECT AIR INLET INDICATOR

- (a) Connect the positive (+) lead from the battery to terminal A-1 and the negative (-) lead to terminal A-2.
- (b) Check that the FRESH and RECIRC indicators light up alternately each time the air inlet control switch button is pressed.
If operation is not as specified, replace the A/C control assembly.

2. INSPECT MODE INDICATOR

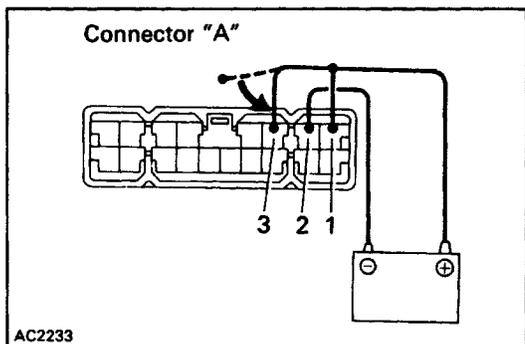

- (a) Connect the positive (+) lead from the battery to terminal A-1 and the negative (-) lead to terminal A-2.
- (b) Push each of the mode buttons in and check that their indicators light up.
If operation is not as specified, replace the A/C control assembly.

3. (with A/C) INSPECT A/C INDICATOR

- (a) Connect the positive (+) lead from the battery to terminal A-1 and the negative (-) lead to terminal A-15.
- (b) Push the A/C switch button in and check that the indicator lights up.

If operation is not as specified, replace the A/C control assembly.

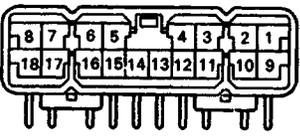

4. INSPECT INDICATOR LIGHT DIMMING OPERATION

- (a) Connect the positive (+) lead from the battery to terminal A=1 and the negative (-) lead to terminal A-2.
- (b) Connect the positive (+) lead from the battery to terminal A-3 and check that the indicators dim.

If operation is not as specified, replace the A/C control assembly.

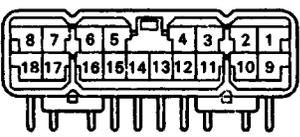

Switches

1. INSPECT AIR INLET CONTROL SWITCH CONTINUITY

 <p>e-18-2-A</p>	Terminal	A-2	A-7	A-8
	Switch position			
	RECIRC			
FRESH				

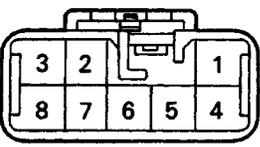

If continuity is not as specified, replace the A/C control assembly.

2. INSPECT MODE CONTROL SWITCH CONTINUITY

 <p>e-18-2-A</p>	Terminal	A-2	A-9	A-10	A-11	A-12	A-13
	Switch position						
	FACE						
	B/L						
	FOOT						
	F/D						
DEF							

If continuity is not as specified, replace the A/C control assembly.

3. INSPECT BLOWER SPEED CONTROL SWITCH CONTINUITY

 <p>AC2277</p>	Terminal		B-1	B-2	B-3	B-4	B-5	B-6	6-7	
	Switch position									
	w/AUTO A/C	w/o AUTO A/C								
	OFF	OFF								
	AUTO	LO								
	LO	□								
	■	□								
HI	HI									

If continuity is not as specified, replace the A/C control assembly.

e-3-2

4. INSPECT TEMPERATURE CONTROL SWITCH (with AUTO A/C)

- (a) Measure the resistance between terminals C-2 and C-3.

Resistance: Approx. 3kΩ

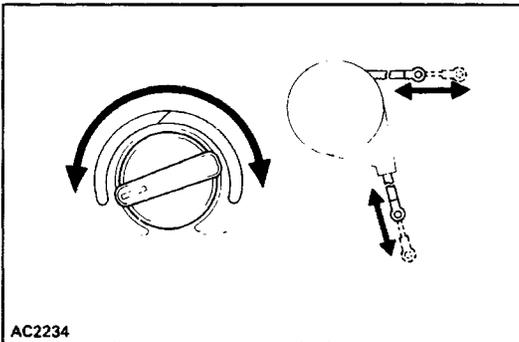

- (b) Check that the resistance between terminals C-1 and C-3 increases from 0 to approx. 3 kΩ when the switch knob is turned from COOL to HOT.

If operation is not as specified, replace the A/C control assembly.

(without AUTO A/C)

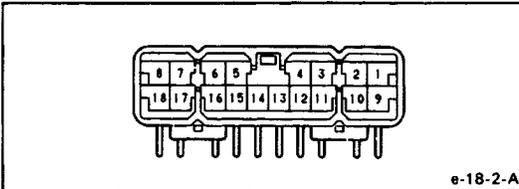

Check that the switch knob turns smoothly and that the control cables contract and expands as the switch knob is turned.

If operation is not as specified, replace the temperature control switch.

AC2234

5. (with A/C) INSPECT A/C SWITCH CONTINUITY

e-18-2-A

Terminal	A-14	A-16
Switch position		
OFF		
ON	○	○

If continuity is not as specified, replace the A/C control assembly.
